

# SECURITY HAS A PROBLEM

Organizations approach physical security and cyber security as separate and independent practices, leading to increased risks.

**Cyber-Physical Integrated Assessments** are the key to improving security across an organization.

## HOW?

### 1 CYBER-PHYSICAL POLICY REVIEW

Map organizational policies and potential exploitations by threat actors.

NIST, ISO, DHS Backed Best Practices

Tailored Map from 72 Policy Areas

Proven DHS, Infrastructure Assessors

Single View of Cyber and Physical Assets

Align the identified cyber-physical threat vectors to known assets.

### 2 CYBER-PHYSICAL INTEGRATED ASSESSMENTS

### 3 EXECUTIVE ALIGNMENT

Communicate recommendations to decision-makers to improve posture.

Expert Infrastructure Facilitators

Translate Vulnerability into Investment

## RESULTS

ORGANIZATIONAL SECURITY KNOWLEDGE & COLLABORATION

VULNERABILITIES ACROSS PHYSICAL & VIRTUAL FOOTPRINT

OPERATIONAL COSTS WITH COORDINATED SECURITY IMPROVEMENTS
